

Case in Point

Richard Allen (Canterbury) Ltd

Instant Savings

Many beauty clinics and hairdressers know that their electricity bills are high, spotlights, driers, and towel washing are all part of service but when Richard Allen applied for the SEEDA funded Energy Grant500 and was loaned an energy meter it showed him just where some of his cash was going. “The meter really set us off as we saw just how much the tumbler dryer was costing us. It was going all day!. But now we are washing towels during the day, hanging them up to dry overnight and just giving them a quick dry to finish them off in the morning”. Instant savings!

let him try out a couple of low energy spots. “I thought the low energy spots were going to be useless, but the test showed me the light quality was good and even better it looks as though they are going to be much cooler to work under”.

Richard was able to change to low energy spotlights and replace several old fluorescent tubes free through the Energy Grant funding.

Not only less money but less heat!

Richard also knew that the 65 spotlights in the salon were not cheap but really wasn't keen on the low energy alternatives. He tried several companies to get quotes but finally found a great local business, The Lamp Post in Canterbury, who came in and worked out what he needed and even
